Experience

WEB PROGRAMMER

Jun - Sep 2023/24

2-year summer student position: Development of the Zangra Galaxy website using Odoo and Sulu.io.
<https://galaxy.zangra.com/>

AI FRONTPAGE

Feb - Jun 2024

5-month internship at ETNIC, developing a RAG system that used the LAMA LLM model to answer questions about the company's internal documents stored in MongoDB.

Education

MASTER IN COMPUTER SCIENCE, ULB

Sep 2024 - Current

I am currently completing a Master's degree in Computer Science in English at the Université Libre Bruxelles, specializing in Artificial Intelligence and Database Science.

BACHELOR IN COMPUTER SCIENCE, HELB

Sep 2021 - Jul 2024

I completed my Bachelor's degree in French at the Haute École Libre de Bruxelles Ilya Prigogine, where I developed several projects, including a biological movement simulation in Java, a website recommending cities to tourists in React, a blog platform built with Django, and a mobile application that generates labyrinths in Java.

ATTENDED COURSES IN ENGINEERING BACHELOR, VUB

Sep 2018 - Jul 2021

I attended Engineering courses at the Vrije Universiteit Brussel in Dutch, where I gained a strong technical foundation and completed several projects, including a stock management system developed in JavaFX.

SECONDARY SCHOOL, INDSC

Sep 2012 - Jul 2018

Obtained a secondary school diploma at INDSC in the french-speaking part of Belgium.

LANGUAGES

Native in Dutch and French

Fully proficient in English (spoken and written).

Skills

COMPETITIONS

HACK'N'WOW

Mar 2023 & Mar 2024

Competed twice in the HACK'N'WOW hackathon. In 2023, developed a proof-of-concept Android application aimed at preserving and promoting local culture and folklore in Wallonia, earning 3rd place in the competition. In 2024, developed an application designed to help teachers keep their courses better organized and easier to manage.

CYBER SECURITY CHALLENGE

Feb 2023 & Feb 2024

Competed for two consecutive years in the Cyber Security Challenge Belgium as part of a three-person team, solving complex cybersecurity challenges in areas such as cryptography, reverse engineering, and network security, and achieving 83rd place out of 500 participants.

HACKATHON CSLABS

Mar 2026

Developed a React application in 24 hours designed to help teach music to children, focusing on an engaging and accessible learning experience. The project earned 1st place in the competition.

INTERESTS

1. Passionate about programming

2. Enjoying outdoor activities such as hiking and camping
3. Volunteering scout leader for more than 8 years
